Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAIL ACTION

Notice to Applicant(s)

1. This office action is responsive to the Response to Restriction Requirement filed on July 30, 2007. The applicant elected group II (claims 8-14 and 17) without transverse. Thus, claims 1-7 and 12-16 have been withdrawn as to non-elected claims.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

3. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. As per claim 8, on lines 3-5, the phrase "outputting a control data calculated by the control operation means" ... "and providing said control data to plurality of control operation means including said control operation means" to unclear as to what are the control operation means and how the control data is either calculated by the control operation mean and also being provided to the control operation means. Clarification is needed. Furthermore, the phrase "the control operation means is described as a function" on line 7 is unclear as the term "described". On lines 7 and 8, the phrase "the reference data" has no antecedent basis, and the phrase "an argument of the function" is not defined properly. Also, the phrase "said control data calculated by said control operation means is the argument of the function which points the return value or the address of said function" on lines 8-10 is totally unclear as to what it refers to. Clarification or correction is requested.

5. On lines 12 and 13, the phrase "extracts the specified information from the source code of said control operation means" is unclear as to what is the specified

Art Unit: 3661

information and how to extract such specified information. Such phrase "the specified information" also lacks an antecedent basis. Moreover, the phrase "generates said corresponding interface means every control operation means based on an analytical result of said analyzing means" on lines 14-16 is unclear as to what is the corresponding interface means is. Clarification and/or correction is requested. Also, which figure numbers describe the features of this claim?

6. The remaining claims (9-14 and 17), not specifically mentioned, are rejected for incorporating the defects from their respective parent claims by dependency.

Conclusion

7. In view of the indefinite state(s) of the claimed invention, no prior art has been applied against the claims. However, applicants are requested to consider the cited references below fully when responding to the office action.

8. The following references are cited as being of general interest: Adam Smith et al. (7,117,504), Joseph Saib et al (6,429,885), Thomas Sesena et al. (6,768,941), and Hermann Gasessle et al. (6,192,331).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Q. Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM.
